🎓 EDUCATION

Indian Institute of Technology - Palakkad, Kerala, India

2025 – 2027

MTech in Data Science | CGPA: 9.03

Finolex Academy of Management and Technology, Ratnagiri, Maharashtra, India

2021 – 2025

BE in CSE(AI&ML) with Honours in Data Science - University of Mumbai | CGPA: 9.55

👤 EXPERIENCE

Pleximus Inc., Ratnagiri, Maharashtra, India

Aug 2024 – Jul 2025

Software Development Intern

- **Stock Price and Movement Prediction:**

Django, PostgreSQL, TimescaleDB

- Developed a data-driven full-stack application for stock price and movement prediction.
- Designed REST APIs and database-backed workflows for financial time-series data and ML predictions.

- **Face Recognition Attendance System:**

Python, OpenCV, DeepFace, Flutter, MySQL

- Built a computer vision-based attendance system with a Flutter Android client and Flask backend.
- Optimized image preprocessing and face recognition pipeline for low-latency real-time execution.

🔑 KEY PROJECTS

- **C Programming Lab Auto Grader**

C, Python, Linux

- Developed an automated programming-assignment evaluation system for C programming labs/contests.
- Remote compilation, robust execution, test-case evaluation, and grading
- **Currently used in institute laboratory course**, helping to reduce manual efforts.

- **Timetable Scheduler**

Python, Linear Programming

- Developed a constraint-based timetable scheduling system using linear programming to generate feasible schedules under multiple academic constraints.
- Application provided to **IIM Kozhikode** for scheduling their EPGP programs.

- **Parliamentary Proceedings Analysis**

Python, NLP, Data Analysis

- Developed an NLP pipeline for processing and analyzing parliamentary proceedings to extract structured insights from large collections of textual data.
- Applied text processing and NLP techniques for analysis, and downstream interpretation of parliamentary records; compared different models and techniques for accuracy and efficiency.

- **AquaSense: GIS Monitoring System**

React, PostgreSQL, PostGIS

- Built a GIS dashboard for monitoring and visualizing water distribution networks.
- Integrated PostgreSQL/PostGIS for spatial data storage, indexing, visualization, and geospatial queries.
- Designed the system to support future IoT sensor integration for real-time monitoring and automation.
- Presented in **M#23 hackathon**, MIT Manipal, Udupi

⚙️ TECHNICAL SKILLS

- **Languages:** Python, SQL, C++, C, Java
- **Data Science & AI/ML:** PyTorch, TensorFlow, OpenCV, NLP, LLMs, NumPy, Pandas
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Tools:** Linux, Git, GitHub, Docker
